

STATE OF CALIFORNIA  
CALIFORNIA ENVIRONMENTAL PROTECTION AGENCY  
STATE WATER RESOURCES CONTROL BOARD

**DIVISION OF WATER RIGHTS**

**PERMIT FOR DIVERSION AND USE OF WATER**

**PERMIT 20999**

Application **30430** of **Mark J. Schrader and Cindy D. Schrader**  
**7725 Autumn Lane, Loomis, CA 95650**

filed on **February 15, 1995**, has been approved by the State Water Resources Control Board **SUBJECT TO PRIOR RIGHTS** and to the limitations and conditions of this permit.

**Permittee is hereby authorized to divert and use water as follows:**

**1. Source of water**

Source	Tributary to
<b>Unnamed Stream</b>	<b>Miners Ravine thence</b>
	<b>Dry Creek (AKA Linda Creek) thence</b>
	<b>Natomas East Main Drain thence</b>
	<b>Sacramento River</b>

**2. Location of point of diversion**

By California Coordinate System in Zone 2	40-acre subdivision of public land survey or projection thereof	Section	Township	Range	Base and Meridian
<b>North 409,800 feet and East 2,239,750 feet</b>	<b>NW¼ of SE¼</b>	<b>23</b>	<b>11N</b>	<b>7E</b>	<b>MD</b>

**County of Placer**

3. Purpose of use	4. Place of use	Section	Township	Range	Base and Meridian	Acres
<b>Domestic, Fire protection, and Irrigation</b>	<b>NW¼ of SE¼</b>	<b>23</b>	<b>11N</b>	<b>7E</b>	<b>MD</b>	<b>4.6</b>
					<b>Total</b>	<b>4.6</b>

The place of use is shown on map on file with the State Water Resources Control Board.

**This permit is subject to the following terms and conditions:**

5. The water appropriated shall be limited to the quantity which can be beneficially used and shall not exceed **0.45 cubic feet per second** by direct diversion from **September 1 to June 14** of each year for **domestic** purposes; **0.45 cubic feet per second** by direct diversion from **March 1 to June 14** of each year for **irrigation** purposes. The total direct diversion rate shall not exceed 0.45 cubic feet per second. The maximum amount diverted under this permit for all uses shall not exceed **10 acre-feet** per year.

(0000005B)

6. Complete application of the water to the authorized use shall be made by December 31, 2009

(0000009)

7. During the season specified in this permit, the total quantity and rate of water diverted and used under this permit and under permittee's claimed existing right for the place of use specified in the permit shall not exceed the quantity and rate of diversion and use specified in this permit. If the permittee's claimed existing right is quantified at some later date as a result of an adjudication or other legally binding proceeding, the quantity and rate of diversion and use allowed under this permit shall be the net of the face value of the permit less the amounts of water available under the existing right.

Permittee shall forfeit all rights under this permit if permittee transfers all or any part of the claimed existing right for the place of use covered by this permit to another place of use without the prior approval of the State Water Resources Control Board.

Permittee shall take and use water under the existing right claimed by permittee only in accordance with law.

(0000021)

8. To the extent that water available for use under this permit is return flow, imported water, or wastewater, this permit shall not be construed as giving any assurance that such supply will continue. (0000025)

9. The equivalent of the authorized continuous flow allowance for any 30-day period may be diverted in a shorter time, provided there is no interference with other rights and instream beneficial uses, and provided further that all terms and conditions protecting instream beneficial uses are observed. (0000027)

10. This permit is subject to prior rights. Permittee is put on notice that, during some years, water will not be available for diversion during portions or all of the season authorized herein. The annual variations in demands and hydrologic conditions in the Sacramento River are such that, in any year of water scarcity, the season of diversion authorized herein may be reduced or completely eliminated on order of this Board made after notice to interested parties and opportunity for hearing. (0000090)

11. This permit is specifically subject to the prior right of Laguna Del Sol Homeowners Association under appropriation issued pursuant to Application 13718.

12. Permittee maintains the same amount of purchased water from Placer County Water Agency (PCWA) that permittee is currently using for summer water usage and does not attempt to use this water as a means of obtaining access to property of other landowners in the Laguna Del Sol Homeowners Association.

Permittee is not entitled to any Placer County Water Agency (PCWA) releases, spills, or return flows which are not or in the future may be reused by PCWA. PCWA is not required to continue to supply released, spilled, or return flow water into the unnamed stream. Permittee will not divert or impound any foreign water imported by PCWA which PCWA intends to use or make available to its customers at or below the Permittee's proposed point of diversion.

---

**13. All permits issued by the State Water Resources Control Board are subject to the following terms and conditions:**

- (A) Permittee shall maintain records of the amount of water diverted and used to enable the State Water Resources Control Board to determine the amount of water that has been applied to beneficial use pursuant to Water Code Section 1605.
- (B) The amount authorized for appropriation may be reduced in the license if investigation warrants.
- (C) Progress reports shall be submitted promptly by permittee when requested by the State Water Resources Control Board until a license is issued.
- (D) Permittee shall allow representatives of the State Water Resources Control Board and other parties, as may be authorized from time to time by said Board, reasonable access to project works to determine compliance with the terms of this permit.
- (E) Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this permit with a view to eliminating waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Permittee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the permittee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest; and is necessary to preserve or restore the uses protected by the public trust.

(F) The quantity of water diverted under this permit and under any license issued pursuant thereto is subject to modification by the State Water Resources Control Board if, after notice to the permittee and an opportunity for hearing, the Board finds that such modification is necessary to meet water quality objectives in water quality control plans which have been or hereafter may be established or modified pursuant to Division 7 of the Water Code. No action will be taken pursuant to this paragraph unless the Board finds that (1) adequate waste discharge requirements have been prescribed and are in effect with respect to all waste discharges which have any substantial effect upon water quality in the area involved, and (2) the water quality objectives cannot be achieved solely through the control of waste discharges.

(G) This permit does not authorize any act which results in the taking of a threatened or endangered species or any act which is now prohibited, or becomes prohibited in the future, under either the California Endangered Species Act (Fish and Game Code sections 2050 to 2097) or the federal Endangered Species Act (16 U.S.C.A. sections 1531 to 1544). If a "take" will result from any act authorized under this water right, the permittee shall obtain an incidental take permit prior to construction or operation. Permittee shall be responsible for meeting all requirements of the applicable Endangered Species Act for the project authorized under this permit.

***This permit is issued and permittee takes it subject to the following provisions of the Water Code:***

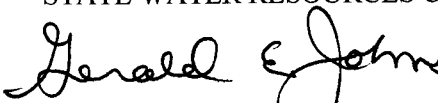

*Section 1390. A permit shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code), but no longer.*

*Section 1391. Every permit shall include the enumeration of conditions therein which in substance shall include all of the provisions of this article and the statement that any appropriator of water to whom a permit is issued takes it subject to the conditions therein expressed.*

*Section 1392. Every permittee, if he accepts a permit, does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefor shall at any time be assigned to or claimed for any permit granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any permittee or by the holder of any rights granted or acquired under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any permittee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).*
